# Practice: Responsive Media and Typography Lab

**Media:** I used a placeholder with a plan for responsive images.

**Typography:** I used CSS variables and clamp to create responsive, readable text.

**Layout Shift:** Used aspect ratio 3/2 to reserve image space.

**Testing:** Testing was done on narrow, wide, zoom, 2G network speeds.

**AI Disclosure:** I used AI for CSS guidance and browser testing instruction. I reviewed my code and completed testing myself.
